Introduction

The *Report Card on Ontario's Secondary Schools 2019* (hereafter, *Report Card*) collects a variety of relevant, objective indicators of school performance into one, easily accessible public document so that anyone can analyze and compare the performance of individual schools. By doing so, the *Report Card* assists parents when they choose a school for their children and encourages and assists all those seeking to improve their schools.

The Report Card helps parents choose

Where parents can choose among several schools for their children, the *Report Card* provides a valuable tool for making a decision. Because it makes comparisons easy, it alerts parents to those nearby schools that appear to have more effective academic programs. Parents can also determine whether schools of interest are improving over time. By first studying the *Report Card*, parents will be better prepared to ask relevant questions when they visit schools under consideration and speak with the staff.

Of course, the choice of a school should not be made solely on the basis of a single source of information. Web sites maintained by Ontario's [Education Quality and Accountability Office \(EQAQO\)](#),¹ the provincial ministry of education, and local school boards may also provide useful information.² Parents who already have a child enrolled at the school provide another point of view.

Naturally, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*. Nevertheless, the *Report Card* provides a detailed

picture of each school that is not easily available elsewhere.

The Report Card facilitates school improvement

The act of publicly rating and ranking schools attracts attention and this can provide motivation. Schools that perform well or show consistent improvement are applauded. Poorly performing schools generate concern, as do those whose performance is deteriorating. This inevitable attention provides an incentive for all those connected with a school to focus on student results.

However, the *Report Card* offers more than just incentive. It includes a variety of indicators, each of which reports results for an aspect of school performance that may be improved. School administrators who are dedicated to their students' academic success accept the *Report Card* as another source of opportunities for improvement.

Some schools do better than others

To improve a school, one must believe that improvement is achievable. This *Report Card*, like other report cards from the Fraser Institute, provides evidence about what can be accomplished. It demonstrates clearly that even when we take into account factors such as the students' family background—which some believe dictate the degree of academic success that students can enjoy in school—some schools do better than others. This finding confirms the results of research carried out in other countries.³ Indeed, it will come as no great sur-

prise to experienced parents and educators that the data consistently suggest that what goes on in the schools makes a difference to academic results and that some schools make a greater difference than others.

Comparisons are at the heart of the improvement process

By comparing a school's latest results with those of earlier years, we can see if the school is improving. By comparing a school's results with those of neighbouring schools or schools having similar school and student characteristics, we can identify more successful schools and learn from them. Reference to overall provincial results places an individual school's level of achievement in a broader context.

There is great benefit in identifying schools that are particularly effective. By studying the techniques used in schools where students are successful, less effective schools may find ways to improve.

Comparisons are at the heart of improvement: making comparisons among schools is made simpler and more meaningful by the *Report Card's* indicators, ratings, and rankings.

You can contribute to the development of the *Report Card*

The *Report Card* program benefits from the input of interested parties. We welcome your suggestions, comments, and criticisms. Please contact co-author Angela MacLeod at angela.macleod@fraserinstitute.org.

Key academic indicators of school performance

The foundation of the *Report Card* is an overall rating of each school's academic performance. We base our *Overall rating out of 10* on the school's performance on seven indicators, all of which are derived from province-wide tests of literacy and mathematics skills that are administered by the province's Education Quality and Accountability Office (EQAO).⁴ They are:

- (1) the average level of achievement on the grade-9 EQAO assessment in academic mathematics;
- (2) the average level of achievement on the grade-9 EQAO assessment in applied mathematics;
- (3) the percentage of [Ontario Secondary School Literacy Tests](#) (OSSLT) written by first-time eligible students that were successfully completed;
- (4) the percentage of Ontario Secondary School Literacy Tests written by previously eligible students that were successfully completed;
- (5) the percentage of all the completed tests written by students at the school that were assessed either as unsuccessful (OSSLT) or below the provincial standard (grade-9 math tests);
- (6) the difference between male and female students in their average levels of achievement on the most commonly written grade-9 EQAO assessment in mathematics; and;
- (7) the difference between male and female students attempting the OSSLT for the first time in their rate of successful completion of the test.

We have selected this set of indicators because they provide useful insight into a school's performance. As they are based on annually generated data, we

can assess not only each school's performance in any given year but also its improvement or deterioration over time.

Indicators of effective teaching

Average results on grade-9 mathematics tests

Fundamental to the mission of secondary schools is ensuring that students are equipped with sound skills in literacy and mathematics. Differences among students in abilities, motivation, and work habits will inevitably have an impact upon the final results. There are, however, recognizable differences from school to school within a district in the average results on both of these tests. There is also variation within schools in the average results obtained on these tests. Such differences in outcomes cannot be explained simply by the individual and family characteristics of the school's students. We believe that teaching makes a difference to student outcomes and it therefore seems reasonable to include the average levels of achievement in these critical subject areas as indicators of effective teaching.

The indicators in mathematics—in the tables, *Avg. level Gr 9 Math (Acad)* and *Avg. level Gr 9 Math (Apld)*—show the average level of proficiency achieved by the school's students on the uniform assessments by the EQAO at the grade-9 level. Generally, each grade-9 student will write only one of the two tests, depending on the mathematics program—academic or applied—in which he or she is enrolled.

The EQAO converts the raw score on each test into a level of achievement from 1 to 4. Achievement at Levels 1 and 2 suggest that the student has not yet

met the provincial standard. Level 3 is considered the provincial standard and Level 4 represents achievement well above the provincial standard. Achievement at Level 3 or 4 suggests that students are prepared for work at the next grade.

In order to calculate the average level achieved by the students at a school on each test, a numerical value was given to each level of achievement. Thus, Level 1 was given a value of 1 for purposes of determining the average; Level 2, a value of 2; Level 3, a value of 3; and Level 4, a value of 4. A value of 0 was given in those cases where a student completed the test but did not demonstrate sufficient understanding to be assigned achievement Level 1.

Percentage of OSSLTs successfully completed

In most cases, students must pass the [Ontario Secondary School Literacy Test](#) (OSSLT) in order to graduate. It is first written in grade 10. Students who do not pass the test in grade 10 may write the test again in subsequent school years. The OSSLT indicators report the success rate on the OSSLT by students who have not previously attempted the test—in the tables *OSSLT passed (%) - FTE*—and students who have unsuccessfully attempted the test in the past—in the tables *OSSLT passed (%) - PE*.

Percentage of grade-9 mathematics and OSSLT tests below standard

Presented in the tables as *Tests below standard (%)*, this indicator combines the results of all the OSSLT and grade-9 mathematics tests written by the students at the school. However, for the purposes of the calculation of the *Overall rating*, the percentage of tests below standard for these two test series are calculated separately.

For each school, this indicator reports the combined rate of failure on the grade-9 math tests and the OSSLT. It was derived by dividing the total number of all the above tests that provided enough information to enable the calculation of a score but did not meet the provincial standard by the total number of such tests written by the students at the school.

Since literacy and mathematical skills are critical to students' further intellectual and personal development, students should, at the minimum, demonstrate that they meet the accepted standard of performance for their grade in these subject areas. Schools have the responsibility of ensuring that their students are adequately prepared to do so.

How well do the teachers take student differences into account? The Gender gap indicators

The *Gender gap* indicators—in the tables *Gender gap (level) Math* and *Gender gap-OSSLT*—determine how successful the school has been in narrowing the achievement gap between male and female students in literacy and mathematics.⁵ These indicators are determined, for each subject area, by calculating the absolute value of the difference between male and female students in their average level of achievement (in mathematics) or success rate (in the OSSLT). The more successful sex is reported along with the difference in the detailed tables.

Undoubtedly, some personal and family characteristics, left unmitigated, can have a deleterious effect on a student's academic development. The *Report Cards* provide evidence that successful teachers overcome such impediments. By comparing the results of male and female students in two skills areas—literacy and mathematics—in which one group or the other has enjoyed a historical advantage, we are able to gauge the extent to which schools provide effective teaching to all of their students.

In general, how is the school doing, academically? The Overall rating out of 10

While each of the indicators is important, it is almost always the case that any school does better on some indicators than on others. So, just as a teacher must make a decision about a student's overall performance,

we need an overall indicator of school performance—in the tables *Overall rating out of 10*. Just as teachers combine test scores, homework, and class participation to rate a student, we have combined all the indicators to produce an overall rating. The overall rating of school performance answers the question, “In general, how is the school doing academically compared to the other schools in the Report Card?”

To derive this rating, the results for each of the seven indicators, for each school year, were first standardized. Standardization is a statistical procedure whereby sets of raw data with different characteristics are converted into sets of values sharing certain sta-

tistical properties. Standardized values can readily be combined and compared. The standardized data were then weighted and combined to produce an overall standardized score. Finally, this score was converted into an overall rating out of 10. It is from this *Overall rating out of 10* that the school’s provincial rank is determined.

For schools in which there were fewer than 10 test results for boys or for girls, no values for the *Gender gap* indicators can be provided. In these cases the *Overall rating out of 10* is derived using the remaining indicators. (See Appendix 1 for an explanation of the calculation of the *Overall rating out of 10*.)

Other indicators of school performance

The *Report Card* includes other indicators that, while they are not used to derive the *Overall rating out of 10*, provide supplementary information about the school's effectiveness.

The *Tests not written* indicator

Schools that administer the assessments provided by the Education Quality and Accountability Office (EQAO) are expected to ensure that all their students write the tests. Higher participation rates provide the benefit of objective assessment of learning to more students and parents. They also provide a more accurate reflection of the level of achievement at the school. A reader can have more confidence that the test results are a true reflection of the school's average achievement level if all, or almost all, of its students write the tests.

The participation rate indicator—in the tables *Gr 9 tests not written (%)*—was determined by first summing, for both of the grade-9 math tests, the total number of students for whom no test data were submitted or who were exempt from testing. This result was then divided by the total number of these tests that could have been completed had all students fully participated.

The principal of a school at which a relatively large percentage of students did not complete the tests should be able to provide good reasons for the students' failure to do so and a well-developed plan to increase participation in future test sittings.

As the *OSSLT* is a compulsory component of Ontario's graduation program and must be successfully completed by all students prior to graduation, it is unnecessary to consider it in the calculation of this indicator.

The *Trend* indicator

Is the school improving academically? The *Report Card* provides five years of data for most schools. Unlike a snapshot of one year's results, this historical record provides evidence of change (or lack thereof) over time. To detect trends in the performance indicators, we developed the *Trend* indicator. This indicator uses statistical analysis to identify those dimensions of school performance in which there has likely been real change rather than a fluctuation in results caused by random occurrences. To calculate the trends, the standardized scores rather than raw data are used. Standardizing makes historical data more comparable and the trend measurement more reliable. Because calculation of trends is uncertain when only a small number of data points are available, a trend is indicated only in those circumstances where five years of data are available and where the trend is statistically significant. For this indicator, we have defined the term "statistically significant" to mean that, nine times out of 10, the trend that is noted is real; that is, it did not happen just by chance.

The student characteristics indicators

For each school, the *Report Card* notes the percentage of its students who are enrolled in English as a second language/English language learner programs or who have certain identified special needs. As was noted in the Introduction, it is sometimes useful to compare a school's results to those of similar schools. These two indicators can be used to identify schools with similar student-body characteristics.

Notes

- 1 The Education Quality and Accountability Office (EQAO) is an arm's-length agency of the provincial government. It provides parents, teachers, and the public with information about student achievement. For more information, see the EQAO's web site at <http://www.eqao.com/>.
- 2 See, for instance, the Ministry of Education's web site at <http://www.edu.gov.on.ca>, the web site of the Toronto Catholic District School Board at <http://www.tcdsb.org/>, and the web sites of schools of interest.
- 3 See, for instance, Michael Rutter et al., *Fifteen Thousand Hours: Secondary Schools and Their Effects on Children* (Harvard University Press, 1979) and Peter Mortimore et al., *School Matters: The Junior Years* (Open Books, 1988).
- 4 The EQAO's test results, student enrollment data, and school information used or reported in this publication were provided by the Ontario Ministry of Education. The results or views expressed in this publication are those of the authors and are not those of the Ontario Ministry of Education.
- 5 For a discussion of gender-based differentials in academic achievement, see Peter Cowley and Stephen Easton, *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*. Public Policy Sources 22 (Fraser Institute, 1999).

Detailed school reports

Use the sample table and the explanation of each line below to help you interpret the detailed results for individual schools. Families choosing a school for their children should seek to confirm the *Report Card*'s findings by visiting the school and interviewing teachers, school administrators, and other parents. More information about the schools may be found at <http://ontario.compareschoolrankings.org>. More information regarding test results at individual schools can be found on the Education Quality and Accountability Office (EQAO) web site at <http://www.eqao.com> and on the web sites of local school districts and schools. Of course, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*.

Important note

Private schools are not required to administer the grade-9 EQAO tests. Since the *Report Card* is based, in part, on results achieved on these tests, only those private schools that chose to administer the EQAO tests could be included.

IMPORTANT — In order to get the most from the *Report Card*, readers should consult the complete table of results for each school of interest. By considering several years of results—rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.

A – GEOGRAPHICAL AREA							
B – School name [Affiliation] City	OSSLT count: 422						
C – ESL (%): 6.9				Special needs (%): 18.7			
D – Actual rating vs predicted based on parents' avg. inc. of \$ n/a: n/a			Rank:	164/738	Last 5 Years 129/625		
Academic Performance	2014	2015	2016	2017	2018	Trend	
E – Avg. level Gr 9 Math (Acad)	3.0	3.0	2.9	3.0	3.0	—	} N
F – Avg. level Gr 9 Math (Apld)	2.7	2.2	2.5	2.4	2.6	—	
G – OSSLT passed (%)-FTE	87.7	87.5	86.2	87.4	85.8	▲	
H – OSSLT passed (%)-PE	n/a	87.0	66.7	85.7	66.7	n/a	
I – Tests below standard (%)	13.1	15.2	16.3	12.7	15.2	—	
J – Gender gap (level)-Math	E	E	E	F 0.1	M 0.1	▼	
K – Gender gap-OSSLT	F 9.6	F 11.9	F 12.1	F 8.8	F 10.9	—	
L – Gr 9 tests not written (%)	1.7	1.5	1.2	1.1	1.4	—	
M – Overall rating out of 10	7.3	7.3	7.1	7.6	7.3	—	

A — The schools are grouped into geographical areas. To find a school's results, find its location in the "List of cities and geographical areas" and note its geographical area. Find the geographical area in the "Index of geographical areas" and note the page on which its results begin. Within each geographical area, the schools are listed in alphabetical order.

B (left) — The school name, its affiliation—public, Catholic, or private—and the city in which the school is located.

B (right) — The number of students at the school who were eligible to write the [Ontario Secondary School Literacy Test](#).

C — These statistics report the percentage of the students at the school, who are eligible to write the OSSLT, who are enrolled in ESL programs, and the percentage who have an identified special need. Use these statistics to identify schools at which the students share some personal characteristics.

D (left) — Actual rating versus predicted based on parents' average employment income. This statistic is not available this year.

D (right) — The school's overall academic rank in the province for 2017/2018 and for the most recent five years. The rankings show how the school has done academically compared to the other schools in the report card. A high ranking over five years indicates consistently strong results at the school.

E and F — The average level achieved by the students on the grade-9 academic (Acad) and applied (Apld) mathematics tests. The EQAO assigns a level of achievement to each completed test. Achievement at Levels 1 and 2 suggest that the student has not yet met the provincial standard. Level 3 is considered the provincial standard and Level 4 represents achievement well above the provincial standard. Thus, achievement at Level 3 or 4 suggests that students are well prepared for work at the next grade. In order to calculate the average level, a numerical value was given to each level of achievement. Thus, Level 1 was given a value of 1 for purposes of determining the average; Level 2, a value of 2; Level 3, a value of 3; and Level 4, a value of 4. In those cases where a student completed the test but did not demonstrate sufficient understanding to be assigned achievement Level 1, the test was given a value of 0.

G & H — The percentage of eligible OSSLT writers who successfully completed the test, either on their first attempt (FTE) or on a subsequent attempt (PE).

I — The percentage of all the completed tests written by students at the school that were judged to be either unsuccessful (OSSLT) or below Level 3

(grade-9 math tests). A low percentage of *Tests below standard (%)* indicates that the school is successful in ensuring that most of its students are meeting or exceeding the provincial standard of performance.

J and K — The difference (in average level of achievement) between girls and boys in the most frequently written grade-9 mathematics test and the OSSLT. Where the difference favours the girls, the value is preceded by an F. Where boys are favoured, the value is preceded by an M. An E means that there is no difference between the girls and the boys on this measure. Smaller differences indicate that the school is doing a good job for all its students.

L — The percentage of the grade-9 mathematics tests that could have been completed by the school's students but which were not assigned an overall score. The percentage, *Gr 9 Tests not written (%)*, takes into account the total number of students for whom no test data were submitted or who were exempt from testing.

Important note: Schools that administer these tests are expected to ensure that all their students participate. For this reason, you should take note of the *Tests not written* percentage when you consider each school's results in the *Report Card*. The principal of a school with a high *Tests not written* percentage should be able to provide good reasons for the students' failure to complete the tests.

M — The *Overall rating out of 10* takes into account the indicators described in E through K above to answer the question, "In general, how is the school doing academically compared to other schools in the report card?"

Important note: The *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its *Overall rating out of 10*, it must improve more rapidly than the average. If it improves, but at a rate less than the average, it will show a decline in its rating.

N — An upward-pointing arrow at the end of an indicator row means that the school is probably improving on that indicator. A downward-pointing arrow means that the school is probably getting worse. The researchers had to be at least 90% sure that the changes were not just random before indicating a trend. A dash indicates that there is no significant change. Where insufficient data were available, “n/a” appears in the column. Note that for the two *Gender gap* indicators and *Tests below standard* a downward trend in the data will lead to an upward-pointing arrow in the trend column. For example, a decreasing *Tests below standard (%)* indicates improvement and so an upward-pointing arrow is displayed.

Other notes

Note 1

Not all the province's secondary schools are included in the tables or the ranking. In order to be included, schools must have had, in the school year 2017/2018, at least 10 students who wrote either of the two versions of the grade-9 EQAO mathematics test and at least 10 “first-time-eligible” (FTE) or “previously eligible” (PE) writers of the Ontario Secondary School Literacy Test. Private schools and federally funded schools operated by First Nations are not required to administer the grade-9 mathematics tests. Since the results of these tests form the basis for this *Report Card*, only those schools that administer them could be included. Finally, also excluded are schools that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating out of 10*. **The exclusion of a school from the *Report Card* is not a judgement of the school's effectiveness.**

Note 2

The EQAO's test results, student enrollment data, and school information used or reported in this

publication were provided by the Ontario Ministry of Education. The results or views expressed in this publication are those of the authors and are not those of the Ontario Ministry of Education.

Note 3

In accordance with its regulations regarding the privacy of personal information, where the school average result on a test related to fewer than 10 students, for privacy reasons, the EQAO provided no data.

Note 4

Where there were insufficient data available with which to calculate an indicator or where a school was not in operation during a specific year, “n/a” appears in the tables.

Note 5

If you have questions about the *Report Card*, please contact co-author Angela MacLeod at angela.macleod@fraserinstitute.org.

Note 6

You can compare a school's results with these all-schools average results in the table below.

Average values for all schools 2017/2018						OSSLT count: 254	
ESL (%):	9.0					Special Needs (%):	26.4
Parents' avg income:	\$ n/a						
Academic Performance	2014	2015	2016	2017	2018	Trend	
Avg. level Gr 9 Math (Acad)	2.9	2.8	2.8	2.8	2.9	—	
Avg. level Gr 9 Math (Apld)	2.4	2.4	2.3	2.3	2.3	▼	
OSSLT passed (%)-FTE	80.4	80.3	78.7	79.0	76.8	▼	
OSSLT passed (%)-PE	52.4	53.1	52.2	53.6	48.9	—	
Tests below standard (%)	26.0	26.2	27.2	27.1	27.5	▼	
Gender gap (level)-Math*	0.1	0.1	0.1	0.1	0.1	—	
Gender gap (% passed)-OSSLT*9.6	9.2	8.7	9.9	11.8	—	—	
Gr 9 tests not written (%)	1.7	1.8	1.6	1.8	1.7	—	
Overall rating out of 10	6.0	6.0	6.0	6.0	6.0	n/a	

* These results reflect the average size of the gender gaps in 2017/2018. The Gr 10 OSSLT gender gap favoured females at 91.2% of schools, males at 7.5% of schools, and was even at 1.3% of schools. The Gr 9 Math gender gap favoured males at 41.4% of schools, females at 29.1% of schools, and was even at 29.5% of schools.

How does your school stack up?

Important notes to the rankings

In this table, schools are ranked (on the left hand side of the page) in descending order (from 1 to 731) according to their academic performance as measured by the Overall rating out of 10 (shown on the right side of the table) for the school year 2017/2018. Each school's five-year average ranking and Overall rating out of 10 are also listed. The higher the overall rating (out of 10), the higher the rank awarded to the school.

Where schools tied in the overall rating, they were awarded the same rank. Where fewer than five years of data were available, "n/a" appears in the table.

Not all the province's secondary schools are included in the tables or the ranking. In order to be included, schools must have had, in the school year 2017/2018, at least 10 students who wrote either of the two versions of the grade-9 EQAO math test and at least 10 first-time-eligible or previ-

ously eligible writers of the Ontario Secondary School Literacy Test. Private schools, including federally funded schools operated by the First Nations, are not required to administer the grade-9 EQAO tests. Since the results of these tests are a necessary component of this Report Card, only those private schools that both administered the EQAO tests and allowed the publication of their results could be included.

The exclusion of a school from the Report Card should in no way be construed as a judgement of the school's effectiveness.

IMPORTANT: In order to get the most from the *Report Card*, readers should consult the complete table of results for each school of interest. By considering several years of results—rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.

Appendix: Calculating the Overall rating out of 10

The *Overall rating out of 10* is intended to answer the question, “In general, how is the school doing, academically compared with others in the report card?” The following is a simplified description of the procedure used to convert the data received from the [Education Quality and Accountability Office](#) into the *Overall rating out of 10*.

- 1 The results for English and French language examinations are separately subjected to the following procedures.
- 2 The *Average levels* achieved on each of the two grade-9 mathematics tests, the two [OSSLT](#) results (FTE and PE), and the indicators of failure on the four test sittings were standardized by calculating Z , which is defined by:

$$Z = (X - \mu) / \sigma$$

where X is the individual school’s result, μ is the mean of the all-schools distribution of results, and σ is the standard deviation of the same all-schools distribution.

- 3 The standardized data for results data were then aggregated. The weighting used was the number of student writers of each test relative to the total number of student test writers in the relevant subject area.
- 4 Similarly, the standardized data for the indicators of failure were aggregated using the same method of weighting.
- 5 The *Gender gap* values for the grade-9 mathematics test and the OSSLT were each calculated by determining the absolute value of the difference in the level of achievement (or success rate in the case of the OSSLT) of male students and female students at the school. The results for each subject were then standardized.
- 6 The four standardized indicator results created in steps 3, 4, and 5 were then combined to produce a weighted, average, summary standardized score for the school. The weightings used in these calculations were: combined results indicator—45%; combined fail rate indicator—45%; gender gap measures—5% each. For schools where there were fewer than two gender gap results, the weightings for the missing gender gap indicators were assigned to the combined fail rate indicator.
- 7 This summary standardized score was re-standardized.

This standardized score was converted into an overall rating between 0 and 10 as follows:

- 8 The allowable maximum and minimum standardized scores were set at 2.2 and -3.29 respectively. Scores equal to, or greater than, 2.2 receive an overall rating of 10. This cut-off was chosen because it allows more

than one school in a given year to be awarded 10 out of 10. Scores of equal to, or less than, -3.29 receive the lowest overall rating of 0. Schools with scores below -3.29 are likely to be outliers, a statistical term used to denote members of a population that appear to have characteristics substantially different from the rest of the population. We chose, therefore, to set the minimum score so as to disregard such extreme differences.

- 9 The resulting standardized scores were converted into *Overall ratings out of 10* according to the formula:

$$OR = \mu + (\sigma * StanScore)$$

where OR is the resulting *Overall rating out of 10*, μ is the average calculated according to the formula:

$$\mu = (OR_{\min} - 10 (Z_{\min} / Z_{\max})) / (1 - (Z_{\min} / Z_{\max}))$$

where σ is the standard deviation calculated according to the formula:

$$\sigma = (10 - \mu) / Z_{\max}$$

and *StanScore* is the standardized score calculated in (6) above and adjusted as required for minimum and maximum values as noted in (7) above. As noted in (7) above, OR_{\min} equals zero, Z_{\min} equals -3.29 ; and Z_{\max} equals 2.2.

- 10 Finally, the derived *Overall rating out of 10* is rounded to one place of the decimal to reflect the significant number of places of the decimal in the original raw data.

Note that the *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its *Overall rating out of 10*, it must improve more than the average. If it improves, but at a rate less than the average, it will show a decline in its rating.

About the authors

Peter Cowley

Peter Cowley is a Senior Fellow and former Director of School Performance Studies at the Fraser Institute. He has a B.Comm. from the University of British Columbia (1974). In 1994, Mr Cowley independently wrote and published *The Parent's Guide*, a popular handbook for parents of British Columbia's secondary-school students. The Parent's Guide web site replaced the handbook in 1995. In 1998, Mr Cowley was co-author of the Fraser Institute's *A Secondary Schools Report Card for British Columbia*, the first of the Institute's continuing series of annual reports on school performance. This was followed in by *The 1999 Report Card on British Columbia's Secondary Schools, Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*, and *The 1999 Report Card on Alberta's High Schools*. Since then, Mr Cowley has co-authored all of the Institute's annual Report Cards. Annual editions now include Report Cards on elementary and secondary schools in British Columbia, Alberta, and Ontario and on secondary schools in Quebec.

Angela MacLeod

Angela MacLeod is a Senior Policy Analyst at the Fraser Institute, conducting research for the Barbara Mitchell Centre for Improvement in Education, and the Centre for School Performance Studies. After completing a Bachelor of Business Administration from Acadia University, she spent time working in banking and management before pursuing a Master of Public Policy from the University of Calgary. The focus of her graduate studies was social and economic policy, and her final paper, *Noble Frustrations: The Many Practical Problems with Municipal Poverty Initiatives*, was subsequently published by the Manning Foundation. She was formerly the executive director of a school-choice advocacy organization and is passionate about improving K-12 education across the country. She is the co-author of numerous education policy studies including *Where Our Students Are Educated: Measuring Student Enrolment in Canada, 2017* and *Comparing the Family Income of Students in Alberta's Independent and Public Schools*.

Purpose, funding, & independence

The Fraser Institute provides a useful public service. We report objective information about the economic and social effects of current public policies, and we offer evidence-based research and education about policy options that can improve the quality of life.

The Institute is a non-profit organization. Our activities are funded by charitable donations, unrestricted grants, ticket sales, and sponsorships from events, the licensing of products for public distribution, and the sale of publications.

All research is subject to rigorous review by external experts, and is conducted and published separately from the Institute's Board of Directors and its donors.

The opinions expressed by the authors are those of the individuals themselves, and do not necessarily reflect those of the Institute, its Board of Directors, its donors and supporters, or its staff. This publication in no way implies that the Fraser Institute, its directors, or staff are in favour of, or oppose the passage of, any bill; or that they support or oppose any particular political party or candidate.

As a healthy part of public discussion among fellow citizens who desire to improve the lives of people through better public policy, the Institute welcomes evidence-focused scrutiny of the research we publish, including verification of data sources, replication of analytical methods, and intelligent debate about the practical effects of policy recommendations.

About the Fraser Institute

Our mission is to improve the quality of life for Canadians, their families and future generations by studying, measuring and broadly communicating the effects of government policies, entrepreneurship and choice on their well-being.

Notre mission consiste à améliorer la qualité de vie des Canadiens et des générations à venir en étudiant, en mesurant et en diffusant les effets des politiques gouvernementales, de l'entrepreneuriat et des choix sur leur bien-être.

Peer review—validating the accuracy of our research

The Fraser Institute maintains a rigorous peer review process for its research. New research, major research projects, and substantively modified research conducted by the Fraser Institute are reviewed by a minimum of one internal expert and two external experts. Reviewers are expected to have a recognized expertise in the topic area being addressed. Whenever possible, external review is a blind process.

Commentaries and conference papers are reviewed by internal experts. Updates to previously reviewed research or new editions of previously reviewed research are not reviewed unless the update includes substantive or material changes in the methodology.

The review process is overseen by the directors of the Institute's research departments who are responsible for ensuring all research published by the Institute passes through the appropriate peer review. If a dispute about the recommendations of the reviewers should arise during the Institute's peer review process, the Institute has an Editorial Advisory Board, a panel of scholars from Canada, the United States, and Europe to whom it can turn for help in resolving the dispute.
